

Introduction

There is no longer any room left for doubt. The United States of America (USA) as we know it must break up into two separate countries. The differences are too great between the powers that be, hereafter descriptively referred to as the Mind Blind vs. the Mind Balanced, and they cannot be reconciled.

To start off, the Mind Blind leaders and their supporters will take the west coast States (California, Oregon, and Washington), plus Hawaii. They will then immediately eliminate those State names (especially Washington) and borders to form the Utopia Socialist State of America (USSA). Its capital will be Seattle (or whichever name it holds at that time). A new Constitution and Bill of Human Rights, as well as a new flag, new pledge of Alliance, new National Anthem, and new National Holidays schedule will be adopted.

As a first order of business for any new country, the USSA government will be created as laid out in this Introduction, including how housing and transportation for the general public will be devised. At the same time, the original and now reinvigorated USA will rise to otherwise impossible—prior to the breakup—heights of unity, positivity, and prosperity, a foundation of which is presented in this Introduction as well.

At the National level, the USSA government will be encapsulated into the Body of Supreme Socialists (BOSS), all 13 of whom will have lifetime appointments. They will vote for one Supreme Leader to represent the USSA on foreign affair matters, otherwise all 13 will have equal power on all National governance matters.

Since they will all belong to a single political party—the Progressive Socialists—the historically relentless impact of the unfair USA-related political tactics and rules will be alleviated all at once. This includes the impact of dark campaign money, lobbying laundering, and especially legislating from the bench, since the BOSS *is* the legislative, executive, and judicial branches combined. Even better, both the USA's electoral college debacle and annoying congressional filibuster will no longer exist to get in the way of Progress. Naturally, pay to play donors, governmental union, and not-for-profit funding conflicts of interest concerns will continue to be brushed aside.

The Local government structure of a Mayor and a 13-person City Center Council (the "CCC") for the three dozen or so major City Center locations (following the consortium-like absorption of the surrounding suburbs and rural areas) throughout the USSA will strictly focus on Equal Outcomes

Programs and Policies (EOPs), under the all-encompassing Free Stuff Fair Share (FS-squared) Local government mantra. Law and Order will be a secondary if not a minimal focus as it has been for decades in many Progressive Socialist run cities in the USA.

All elections will be decided by popular vote, administered only by 100% mail-out ballots (not to be confused with the USA's individually requested absentee ballots), and will *only* be delivered via ballot harvesting, with no exceptions. Since voter fraud is a myth, no rules will apply such as proving one's identity with a valid ID; having a mail-out ballot notarized; only voting once and/or when still alive; or for maintaining current local voter registration rolls.

Upon the death of a BOSS leader, single-party primary-like races will open at the end of a two-week National mourning period. Up to 6 candidates who collect the most signatures will be placed on the ballot one month from the date of death. Voting will be opened exactly 3 months following date of death, after mail-out ballots have been issued everywhere. A 3-week ballot harvesting period will then help minimize any concerns of not allowing enough time to locate missing boxes of ballots (especially boxes with 100% votes for just one candidate).

Locally, Mayorship and CCC terms will run for four years without term limits, with the mail-out ballot harvesting period running from August 15th to November 15th every fourth year with any transition of power going into effect January 1st of the following calendar year. Campaigns will begin 6 months earlier on February 15th, with anyone collecting at least 100,000 signatures eligible to make the ballot, up to the same 6-candidate limit.

With almost all criminal offenses eliminated or rendered meaningless (through no enforcement or some enforcement but without much punishment other than an appearance ticket; elimination of bail; and/or due to an extreme defunding of any actual law enforcement officers), current and former criminals will be permitted to vote at all times. Along with this category of typically non-net-taxpayers, children as young as age 16 will also vote, as well as any and all adults, no matter how short a time they have resided in the USSA, and no matter if they have never reported taxable income, and in fact, have been receiving thousands of dollars per month via non-contributory government assistance programs (i.e., EOPs), year after year.

The USSA's tight-knit National and Local Progressive Socialist Government structure will once and for all render useless voter suppression tactics, redistricting maneuvering, census taking with a citizen question, etc. In fact, every evil aspect of the USA's "Republic" structure and Federalism in general, will be dismantled for good. For obvious reasons, there will no longer be a big

concern for freedom of speech, freedom of religion, or non-elite firearm ownership for self-defense purposes in such a Utopia. However, freedom of assembly and freedom of expression (especially via graffiti, “peaceful protesting,” and looting)—when they fit the approved narrative—will be permitted unabated.

As the standard bearer of the most desirable Progressive Socialist country ever, the USSA will naturally draw the United Nations to relocate its Headquarters from New York City to Los Angeles. A city worthy of the honor given that there is no majority race. A fact that will, via a unanimous worldwide consensus, make Los Angeles the officially recognized Global Capital of the Progressive Socialist World Order (PSWO).

Further, the great Social Justice Warrior (SJW) City of Portland, in coordination with the PSWO Diplomats in Los Angeles, will become home to a Globally centralized social justice enforcement encampment. It will be tasked with, amongst other things, Mind Blind re-indoctrination programs as well as Cancel Culture surveillance, especially on the Mind Balanced. An encampment which will unofficially be dubbed “The Port-a-gone.”

Unofficially since there will never be a true acknowledgement of its existence and exactly what goes on there, and that many subjects that go in, are thereafter “gone.” While unverified, it is believed that Portland’s former USA federal courthouse, ICE, and local police station buildings—now BOSS designated monuments to the evils of the USA’s criminal enforcement system—will be rumored to secretly house it all via undetectable underground connecting tunnels.

For those residents (the concept of citizenship will be deemed racist and will be banned entirely) living in the USSA and all those who migrate from lands close and far, the 325,000 square miles of territory which made up California, Oregon, etc. will be more than enough. As with any modern-day Progressive Socialist society undertaking, existing housing privately owned by non-elites will be subject to the Greenest Omnipresent Deal (GOD) environmental and energy standards.

Mimicking the Mind Blind leadership’s long-sort-after aspirations for the suburbs in the USA, rezoning laws in the USSA will take things further than ever dreamed possible under GOD. New housing developments will be restricted to at least 75% affordable residential units with no unit—affordable or otherwise—exceeding 1,300 square feet of allotted living space. Each housing

structure will be built on limited-sized designated property lots 100% own by the Local government—in the name of fairness of course.

In the name of Progress, existing single-residential units (the terms “single-family” and “multi-family” will also be banned) privately owned by the non-elite beyond 1,300 square feet will be subject to governmental random reviews and recommendations for conversion into affordable multi-residential units at the owner’s expense, and once completed, will be subject to strict monthly rent controls. A necessary move to accelerate the Utopian vision of having affordable housing for all, even for those individuals who do not want and will not take on the responsibility of maintaining said housing. GOD-dictated rules and regulations which will lay the foundation, literally, for an Equal Outcomes society. Unless you are an Elite, who will continue to privately own large walled-in mansions along the coastal parts of the USSA or within well-guarded gated communities located inland.

Further, access to electric-powered vehicles (all gasoline-powered vehicles will be illegal to possess in the USSA after the split) will be limited to USSA National and Local Government leadership and high-level bureaucrats, and the usual list of self-proclaimed Elite types (University Heads, Mainstream Media, Hollywood Entertainers, Professional Sports Icons, etc., and the otherwise well-connected). As a result of the automobile ban, the only individual non-elite resident transportation ownership options—self, solar, or electric-powered bicycles, scooters, and mopeds—will not require much in garage or curbside storage space. To travel within the USSA, high-speed rail trains will connect all USSA major hubs, and electric-powered buses will then take non-elite travelers to their destination hubs, in addition to everyday local commuters.

From there, the aforementioned bicycles, scooters, and/or mopeds plus optional luggage trailers (including child safety seating) will be available for rent, given how taxi and app-based ground transportation services all became obsolete once automobiles of any power source were no longer legal for non-elite residents to own. Air travel restrictions specific to keeping carbon emissions at COVID-19 pandemic shutdown period levels, will play a major role in USSA-born non-elites never traveling outside the continent of North America during their lifetimes. All worthy sacrifices in the name of Saving the Planet.

If more territory is eventually needed, the USA’s State of Alaska will be the perfect purchase for the USSA, bringing it that much territorially closer to fellow Mainstream Socialist (i.e., communist) states China, North Korea, and Russia. Further, “man-made” global warming, i.e., climate change, i.e., climate crisis. i.e., climate catastrophe is predicted to bring west coast warm weather to Alaska for all to enjoy by 2030 or even sooner. A point at which all 570,000

square miles of coastal and inland territory will be year-round inhabitable given how snow, ice, and the newly renamed “colorless” polar bears will all be extinct. A transaction that would more than triple the USSA to a total of 895,000 square miles overnight once the territory formerly named Alaska is purchased and absorbed.

The USSA will be the ultimate Equal Outcomes society, especially since it will have a completely fresh slate to create it and have minimal Mind Balanced resistance left in its way. An End Game which has non-elite residents knowing that they can always rely on the Government’s allotted means of survival and livelihoods, not counting during any “largely peaceful” protest periods or any government mandate by fiat virus outbreak shutdowns. One where any attempt to repackage such a wonderfully extreme society is not just squashed, but such residents are simply canceled overnight via government-controlled and monitored “Corporate-owned” social media.

In the meantime, the Mind Balanced will lead the USA in reenergizing around the Constitution, Bill of Rights, Constitutional Republic, Federalism, etc., and the individual pursuit of liberty, freedom, happiness, and equality under a Law-and-Order governed Capitalist society. Working towards and then maintaining self-reliance and self-well-being will be every citizen’s and acknowledged resident’s mandate. This on top of how the USA will unite to reinforce and respect the difference between legislative, executive, and judicial powers.

Those who remain in the USA and those who are still drawn there seeking Equal Opportunities and the American Dream will continue to embrace such a system which allows one to work hard, innovate, compete and then reap the countless benefits of their own financial success—including private property ownership—within a Capitalist society. The Mind Balanced leadership and their supporters, the latter of which have all along easily outnumbered the Mind Blind supporters by two or three to one (a.k.a. the legendary silent majority), will make use of the 2,641,000 square miles in the balance of the continental USA accordingly. Naturally, the wait and see approach on a USSA-USA-Alaska deal will then hinge on how many millions flock to the USSA vs. continue to be drawn to the USA, despite its historical flaws.

The ongoing citizens of the USA will collectively recognize and not deny that its history was not always perfect, but under the principles of self-determination and self-perseverance, has moved its best foot forward to an Equal Opportunities country for all. Based on one’s own character formulated by one’s associated Mind, Sexuality, and Class-related choices, individuals will

be emboldened to be the best that they can be within any opportunities which are best suited for them and what they desire out of life.

Simultaneously, the USA will collectively continue to improve on the things that are wrong while not destroying the things that have always been good, in fact better than any other country in the world. Its national heritage has so many accomplishments to build on.

Any non-Walk-away Mind Blind citizens remaining in the USA will be educationally, journalistically, and politically kept in check against any indirectly or directly organized indoctrination attempts, unified Fake News, and/or orchestrated False Narratives. This will be the case especially when the Mind Blind are easily made to commit unforced errors upon the focused Mind Balanced either bringing out the worst in them or getting them to show their true colors. The COVID-19 Pandemic Shutdown, Defund the Police Riots, and Tear it All Down Seasons circa 2020 are a perfect showcase of the latter.

Systemic this and that claims will disappear given how everyone will be valued based on their historical or to-date improved life character and not on any other aspect of their person. Character in terms of individual responsibility and commitments; in terms of priorities, choices, trade-offs, and sacrifices; in terms of politeness and generosity; in terms of productivity and honesty within any given week towards creating, maintaining, and/or improving individual self-reliance and self-well-being.

For those who have read this far, one might be wondering how the breakup of the current 50-State USA will all add up and will be better for all involved in the long run. That is where *Last Call Manifesto* will save the day with minimal to no civil war-level bloodshed. It will help anyone who chooses to proceed, in the course of just a few hours, to connect all of the dots on the “Front-end Why’s” while simultaneously empowering everyone to understand one’s own current worldview, emotions, and feelings when it comes to a government’s proper and well-defined role in Society.

All of this is explainable once one comes to realize that most if not all the Mind Blind vs. Mind Balanced worldview differences cannot be and are not random and they will never be compatible. After completing *Last Call Manifesto*, one’s own eyes and ears will empower one in assessing the “Front-end Why’s” that can explain it all. There are endless real-life and real-time examples for all to see and perhaps finally once and for all acknowledge, every time in fact.

The Mind Blind will find ultimate comfort that the USSA can become their vision of the fairest nation ever. An “Equal Outcomes independent of Equal

Efforts” Utopia Progressive Socialist Society. At the same time, *Last Call Manifesto* will entice more rugged individualism, common sense, and critical thinking than ever before possible for the Mind Balanced leading the USA into the future’s unlimited potential for greatness, and then some, i.e., perfecting an Equal Opportunities Capitalist Society for all no matter their individual at birth characteristics.
